KEEP RESIDENTS AND PROPERTY SAFE

POWERED BY

TRACKTIK
YOUR **SIXTH** SENSE.

The security personnel that staff your property gather a host of valuable information as they go about their job. The reports we provide enable you to keep tabs on how well we're meeting our contractual obligations, but can also help you identify risks. Over time, patterns will emerge, making the picture clearer. To get the best value from your data, you need an easy way to organize it and understand it.

OUR SOLUTION IS TRACKTIK

TrackTik's Reporting and Incident Trending & Analytics module enables you to organize and tap the security information gathered in the field. You can create customized templates for the different types of reports you require us to provide, so that the information is presented in the best way for you to analyze it. Then you can take that data and use it to assess performance, identify risks and trends, and make planning decisions, such as increasing staffing coverage or improving access control. Or you can access analyses we carry out for you and skip straight to the decision-making.
